**VERTEBRON® INC. UNVEILS ITS LATEST ADVANCED PRODUCT TECHNOLOGIES AT THE ANNUAL NASS MEETING**

Stratford, CT – October 23, 2007 – VERTEBRON Inc., a U.S. based spinal implant manufacturer, announced today that it will unveil the latest in its line of evolutionary spinal implants and design concepts at the North American Spine Society meeting in Austin, TX. The newest offerings include a complete PEEK product line, including patented stand-alone ACIF and ALIF interbody devices, Anterior Lumbar locking plates and a proprietary Cervical Motion Preservation device. A private unveiling of a truly advanced and innovative Interspinous Process Spacer device will be presented by Dr. Alexander R. Vaccaro, a noted spinal surgeon innovator and VERTEBRON Medical Advisory Council member, at the Four Season's hotel on Thursday, October 25<sup>th</sup> for a select group of invited surgeons.

Paul Sendro, the newly appointed President and CEO for VERTEBRON stated, "It is with great pleasure, along with our new management team, that we proudly unveil VERTEBRON's expanding fusion line, now with a full complement of interbody solutions, especially for ALIF and 360 procedures. In addition, we have a revolutionary approach to Interspinous Process spacers which provides more secure stabilization to address spinal stenosis. VERTEBRON's innovations, which we are able to deliver to our surgeons, make our latest offering of spine solutions second to none."

VERTEBRON is a privately-held, medical device company that has developed next-generation spinal implants, including artificial discs (motion preservation), cervical plates, pedicle screws and interbody fusion systems which integrate spinal, orthopaedic and total joint technologies. VERTEBRON's comprehensive product portfolio offers simplified surgical techniques with enhanced intra-operative flexibility and innovative instrumentation to spinal surgeons worldwide.
